PROFESSIONAL SUMMARY

DevOps and Cloud Engineering enthusiast with hands-on experience in AWS, Docker, Kubernetes, Jenkins, and Terraform, currently building production-grade CI/CD pipelines and multi-cloud monitoring solutions. Proven ability to design scalable, automated infrastructure that reduces deployment time and improves system reliability. Seeking to leverage strong foundations in Linux, Infrastructure as Code, and containerized environments to drive operational excellence in a DevOps role.

SKILLS

- **Languages:** C++, Python, Bash, PowerShell, YAML
- **Frameworks:** FastAPI, Flask, HTML, CSS, Docker, Kubernetes, DevOps, CI/CD
- **Tools/Platforms:** AWS (EC2, S3, Lambda, CloudWatch, SNS, IAM, VPC), Azure (Virtual Machines, Monitor, App Services), GCP, Linux, MySQL, PostgreSQL, MongoDB, FAISS, Git, GitHub, Jenkins, Terraform, Ansible, Prometheus, Grafana
- **Soft Skills:** Team Work, Time Management, Adaptability

TRAINING AND INTERNSHIP

Dotsquares

July 2026 – Present

DevOps Trainee / Intern | Jaipur, India

- Completing structured DevOps training covering the full infrastructure and automation lifecycle, based on an industry-aligned DevOps roadmap.
- Practiced Linux administration (permissions, users, SSH, networking, cron, SELinux, firewall, shell scripting) and core server setups (DNS, web, database, NFS).
- Worked hands-on with AWS (EC2, VPC, S3, Route 53, IAM, RDS, ECS/EKS), Docker (Dockerfiles, multistage builds, Compose), and Kubernetes (Pods, Deployments, Services, Ingress, RBAC).
- Built CI/CD pipelines with Jenkins and Git/GitHub, provisioned infrastructure with Terraform (IaC), and set up monitoring with Prometheus and Grafana.

PROJECTS

AI Hub: Unified Web Platform for Multi-Modal Intelligence Integration | Jan 2025 – May 2025

- Architected a production-grade full-stack AI platform consolidating 8 services – Handwriting Recognition, Text Summarization, Sentiment Analysis, Image Captioning, Speech-to-Text, Text-to-Speech, Object Detection, and intelligent document processing – into a unified web application.
- Engineered a scalable three-tier architecture (React.js, FastAPI, PostgreSQL, FAISS) enabling concurrent processing of text, image, audio, and document inputs with low-latency inference.
- Implemented a RAG pipeline with BERT embeddings and FAISS vector search for context-aware Q&A; and semantic document retrieval; integrated TrOCR, T5, Whisper, Tacotron2, WaveGlow, and YOLOv5 for multimodal AI workflows.
- Containerized all services using Docker with a cloud-ready deployment architecture (AWS/GCP) supporting scalable inference, concurrent requests, and real-time multi-pipeline processing.
- **Tech Stack:** React.js, FastAPI, Flask, PostgreSQL, FAISS, Docker, PyTorch, Hugging Face Transformers, Whisper, YOLOv5, Tesseract OCR, AWS/GCP

CloudOps Pipeline – Automated CI/CD with Docker, Kubernetes, and Jenkins | Oct 2025 – Dec 2025

- Designed and implemented a Jenkins CI/CD pipeline automating build, test, and deployment for a microservice application, reducing deployment time by 60%.
- Containerized services with Docker and orchestrated on Kubernetes (GKE/Minikube) with auto-scaling, rolling updates, and health checks, achieving 99.9% uptime.
- Configured AWS EC2 instances with GitHub Webhooks for continuous integration and real-time monitoring via Prometheus and Grafana dashboards.

- **Tech Stack:** Jenkins, Docker, Kubernetes (Minikube/GKE), GitHub, AWS EC2, Prometheus, Grafana, YAML

Multi-Cloud Monitoring System – AWS + Azure Integration | Jan 2025 – Mar 2025

- Built a multi-cloud monitoring dashboard aggregating metrics from AWS CloudWatch and Azure Monitor via Boto3 and Azure SDK, reducing manual monitoring efforts by 60%.
- Automated cross-cloud resource provisioning with Terraform using modular IaC architecture; implemented real-time alerting via AWS SNS and Azure Alerts, cutting incident detection time by 65%.
- **Tech Stack:** AWS CloudWatch, Azure Monitor, Terraform, Python (Boto3 + Azure SDK), SNS

CERTIFICATES AND CERTIFICATIONS

- **Microsoft Certified: DevOps Engineer Expert** – Microsoft, February 2026
- **Intelligent Agent Software Development** – Coursera, February 2026
- **Applied Data Engineering** – Coursera, November 2025
- **Azure Administrator Associate** – Microsoft, March 2025
- **Internet of Things** – NPTEL, July 2024

ACHIEVEMENTS

- Secured **1st Position** in 'Incredible 8,' LPU's Inter-Hostel Competition on social media, organized by Lovely Professional University – May 2024

EDUCATION

Lovely Professional University | Sept 2022 – May 2026 | Punjab, India

Bachelor of Technology – Computer Science and Engineering; CGPA: 7.29

Tagore Children Academy | June 2020 – March 2021 | Surajgarh, Jhunjhunu

Intermediate; Percentage: 89%

Tagore Children Academy | July 2018 – May 2019 | Surajgarh, Jhunjhunu

Matriculation; Percentage: 71%
